

## Corner combination for ergonomic packaging

### The benefits +

- Corner solution for optimum space utilisation
- Maximum efficiency thanks to customisable components
- Ball conveyor integrated in the table top for flexible movement of the package
- Integrated roller conveyor for efficient onward transport

Made in Germany by **KRIEG** 10 years warranty

Integrated ball and roller conveyor

# Corner packaging workplace MULTIPLAN

The packing workplace system MULTIPLAN ensures more ergonomic packaging. The corner combination enables optimum utilisation by arranging all work equipment ergonomically. Different carton heights or differences in height to the conveyor belt quickly lead to incorrect ergonomic postures. An integratable process lift can

compensate for these height differences by means of electrical height adjustment and ensures efficient and ergonomic working. The integrated roller conveyor allows the package to be transferred quickly and easily. The ball conveyor also makes it easier to flexibly move and position the packages on the table.

# Corner packaging workplace MULTIPLAN

Healthy working with attached roller conveyor and mobile process lift

**KRIEG | WORKFLEX**  
Healthy workplaces for more profitability

## Process lift for more ergonomics

The process lift was developed to avoid the ergonomic incorrect postures that frequently occur when packing of goods, especially heavy goods. These unhealthy postures often occur due to height differences between the boxes or during transport to the conveyor belt.

Thanks to the parcel lift attached to the roller conveyor, employees can now quickly and effortlessly compensate for these height differences using the electric height adjustment. This not only makes the work process more efficient, but also promotes ergonomic packaging. Once the packaging process has been completed, the roller conveyor enables seamless further transport of the packaged item.

**The benefits at a glance** +

- Process lift for individual ergonomic adjustments to the employee
- Efficient parcel forwarding: roller conveyor for smooth onward transport
- Improved effectiveness and productivity thanks to customised components
- Flexible and electrically adjustable ergonomic table height
- Corner solution for optimum space utilisation
- Tool-free plug-in accessories

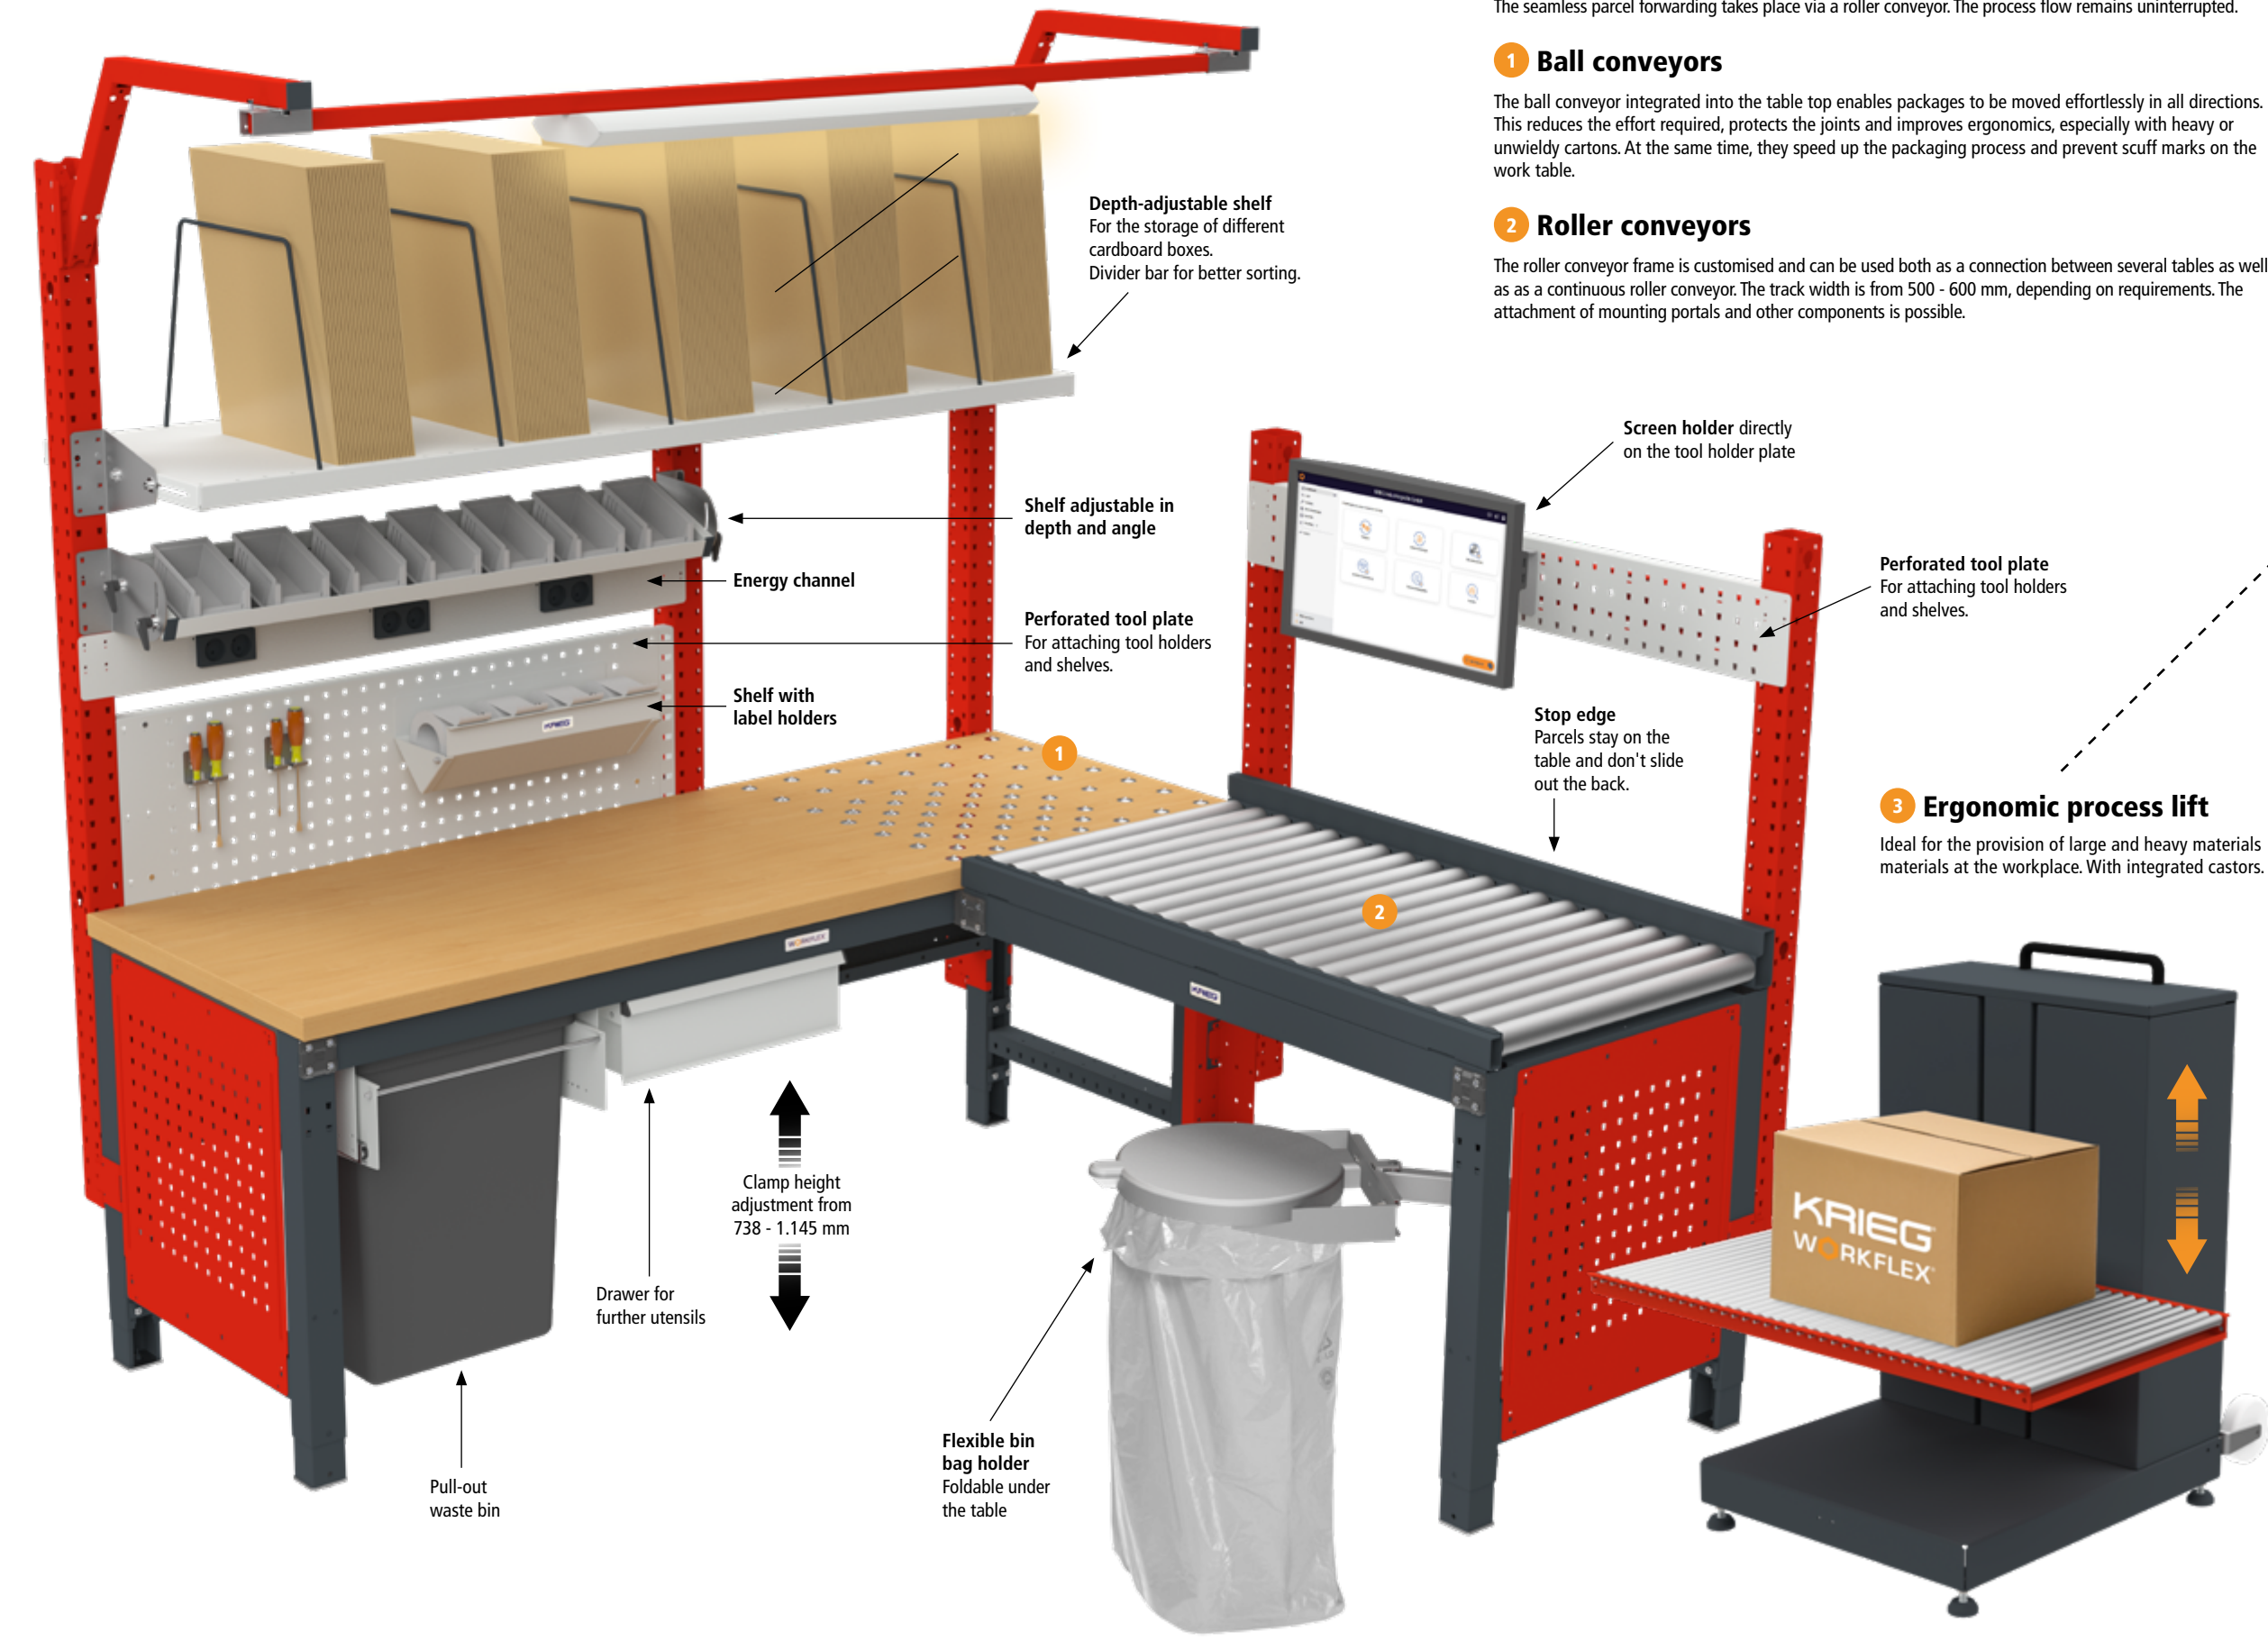

**Technical specifications workplace:**

Width: approx. 1,750 mm  
 Depth: approx. 800 mm  
 Total height: approx. 2,200 mm + 400 mm lift  
 Clamp height adjustment: 738 - 1.145 mm  
 Load capacity: 600 kg  
 excl. tare and attachment weight and only with even weight distribution.

**Tool-less push-fit accessory components throughout**

**Time-efficient assembly and reconfiguration with integrated antidrop system**

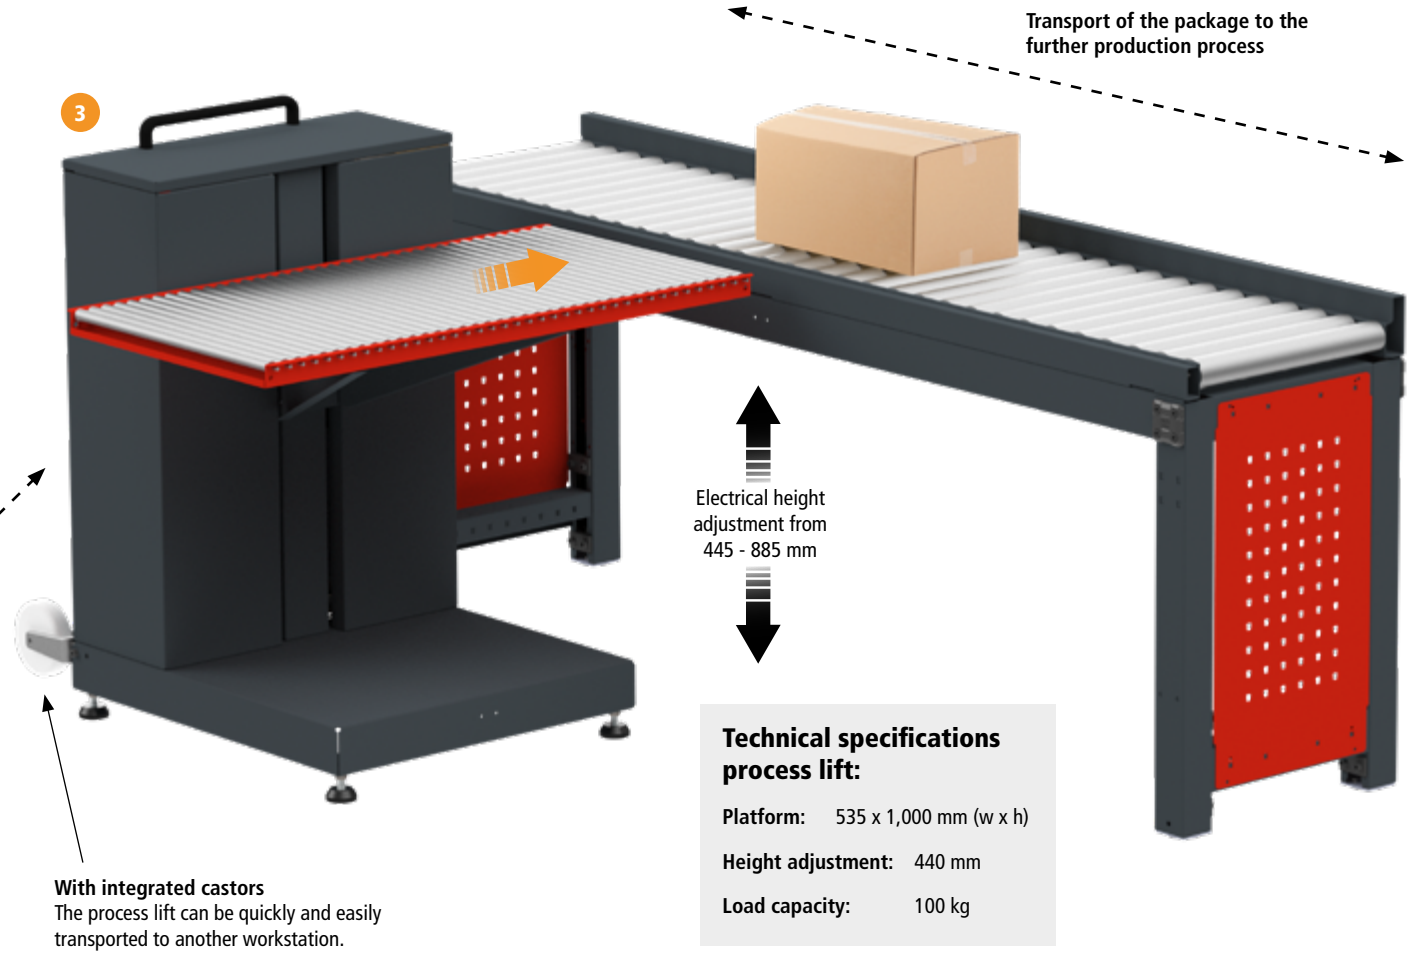

Fast and individual positioning all necessary work equipment is used by Ensuring a health-friendly Posture during the work process.

**Possible integration of conveyors for parcel transport:**  
The seamless parcel forwarding takes place via a roller conveyor. The process flow remains uninterrupted.

- 1 Ball conveyors**  
The ball conveyor integrated into the table top enables packages to be moved effortlessly in all directions. This reduces the effort required, protects the joints and improves ergonomics, especially with heavy or unwieldy cartons. At the same time, they speed up the packaging process and prevent scuff marks on the work table.
- 2 Roller conveyors**  
The roller conveyor frame is customised and can be used both as a connection between several tables as well as as a continuous roller conveyor. The track width is from 500 - 600 mm, depending on requirements. The attachment of mounting portals and other components is possible.

**3 Ergonomic process lift**  
Ideal for the provision of large and heavy materials at the workplace. With integrated castors.

**Operation with foot switch**  
Foot pedal for up and down.

**The benefits at a glance** +

- Quick compensation of height differences
- Relief for employees and prevention of physical injury
- Easier onward transport of the packaged goods onto a conveyor belt
- Enables ergonomic packaging
- Mobile version: With built-in castors for quick relocation

**WE ARE MANUFACTURER**  
WHY NOT BENEFIT FROM OUR SPECIALIST KNOWLEDGE?

- + LARGE PRODUCTION SELECTION
- + MADE IN GERMANY
- + 10 YEAR MANUFACTURER'S WARRANTY
- + INDIVIDUAL CUSTOM-MADE SOLUTIONS

# YOUR BENEFITS

Benefit from our expertise as a manufacturer

## PROJECT IMPLEMENTATION

From the initial drawing to the turnkey assembly

### DESIGNING CUSTOMISED SOLUTIONS

- On-site analysis and professional advice from IGR-certified ergonomics coaches
- CAD visualisation and prototype construction
- From the initial drawing to the turnkey assembly

### IN-HOUSE DESIGN AND DEVELOPMENT

- Over 67 years of experience
- Cost-optimised production options
- High product quality and functionality at a fair price

### IN-HOUSE-TRAINED SPECIALIST FITTERS

- High-quality, precise assembly
- Fast and reliable
- On-schedule and tailored to customer's needs

### Additional services

Made in Germany by **KRIEG** 10 year warranty

Request a sales team visit! 10 colours, one price

Free delivery!

# 67 YEARS' EXPERIENCE

in workplace organisation

## PLAN WITH THE ERGONOMICS PROFESSIONALS

- Expert advice from IGR-certified ergonomics coaches
- Best-point grip spaces - perfectly positioned for your process
- Free on-site analysis and professional advice

### Certified Ergonomic Coaches

Our employees have been certified as ergonomics coaches by the IGR (German Institute for Health and Ergonomics). Our ergonomics coaches will devise the perfect ergonomic concept to satisfy every aspect of your workstation needs.

### IGR certification as mark of our self-assurance

Height-adjustable work tables are increasingly in demand for creating an ergonomic and highly productive work environment. We arranged for our Ergo E and Ergo K table systems to be IGR-certified in order to fulfil our customers' quality expectations.

INNOVATION AWARD FOR ERGONOMICS 2023

### All our efforts have paid dividends!

We have been awarded with the "Innovation Award for Ergonomics 2023" by the German Institute for Health and Ergonomics (IGR) for special achievements in the field of ergonomics. We are pleased to have been awarded again after the "Innovation Award for Ergonomics 2021".
